*Designed with Pros. Engineered to Win.*

## PRODUCT DESCRIPTION

Introducing the [Logitech G PRO X TKL RAPID Wired Gaming Keyboard](https://logitechg.com). It's the iconic PRO build players love, now with analog switches to unlock more options during competitions. Working with pro esports athletes from around the world, it has been designed with ultra-responsive precision to help eliminate barriers between you and the win.

The PRO X TKL RAPID Wired Gaming Keyboard delivers ultimate customization with the performance and reliability of Logitech G engineering. PRO X TKL RAPID ensures fluid, quick reactions for a consistent and reliable experience right out of the box.

The PRO X TKL RAPID delivers a responsive, precise, and consistent experience with rapid trigger functionality to enable fast and responsive control for a critical edge on the path to victory.

Whether you want incredibly sensitive responsiveness or a more measured adjustment to fit your style, the decision is yours. Customize the parameters on every key and choose exactly when and how your key presses turn into actions - fine tune with 0.1 mm increments using Logitech G HUB.

KEYCONTROL technology allows gamers to execute specific commands or build multi-action combos across multiple layers, on every single key. When the game calls for an intricate response, you'll have total control at your fingertips.

The PRO X TKL RAPID Wired Gaming Keyboard will be available in November 2024 in Black, White, and Pink.

## KEY FEATURES

- **MAGNETIC ANALOG SWITCHES:** Analog switches with tournament-grade responsiveness and precision enable:
  - **ADJUSTABLE ACTUATION POINT:** Whether you want incredibly sensitive responsiveness or a more measured adjustment to fit your style, you decide. Customize the parameters on every key and choose exactly when and how your key presses turn into actions. Get your setup dialed and take command.
  - **RAPID TRIGGER:** Rapid trigger functionality for faster, more reliable execution of in-game actions like counter-strafting ensures fluid, quick reactions for a consistent experience right out of the box.
  - **KEY PRIORITY:** Select one of four different comparisons modes, and up to 40 mutually exclusive pairs of keys to enable improved performance for in-game actions. These comparison modes include:
    - Key Travel Priority - compares two selected keys and sends the keystroke of the key pressed the furthest
    - Last Input Priority - compares two selected keys and sends the keystroke of the last key that was pressed
    - Absolute Priority - compares two selected keys and only sends the non-priority keystroke if the priority key is not pressed. If the priority key is pressed, the non-priority key will never be sent
- **PREMIUM CONSTRUCTION:** Features an aluminum backplate and dual-shot PBT keycaps with shine-through legends. Sound dampening materials include two layers of PORON and two layers of IXPE foam, along with polyurethane foam and silicone dampening inserts placed under specific keys. Each switch is individually factory-lubricated for improved feeling and sound.
- **MULTI-POINT ACTION:** One key, two commands. With multi-point, players have the ability to configure specific actions depending on how far the key is pressed down. Customize two stages per key, per layer, through G HUB, and optimize your setup for victory.
- **CUSTOMIZE AND CONTROL:** KEYCONTROL allows you to execute specific commands or build multi-action combos across multiple layers, on every single key. When the game calls for an intricate response, you'll have total control at your fingertips.
- **GAME MODE:** Remove obstacles and avoid mishits while you play. Easily deactivate Windows and Context Menu keys to avoid interruptions or distractions with the centrally-located Game Mode button. G HUB allows players to further customize game mode and decide which additional keys are out of play.
- **LIGHTSYNC RGB:** LIGHTSYNC technology enables dynamic and customizable illumination that can be synchronized to games, videos, and music.

## **SYSTEM REQUIREMENTS**

- PC with Windows 10 or later and USB 2.0 port

## **TECHNICAL SPECIFICATIONS**

- PRO-inspired tenkeyless design
- Magnetic analog switches with 35 g force
- Rapid trigger
- KEYCONTROL
- LIGHTSYNC RGB lighting
- 6ft. (1.8 m) detachable cable
- Onboard lighting profiles
- 1 ms report rate

## **PHYSICAL SPECIFICATIONS**

- Height: 38mm (1.5 in)
- Width: 357mm (14.06in)
- Depth: 150mm (5.91in)

## **WHAT'S IN THE BOX**

- PRO X TKL RAPID Wired Gaming Keyboard
- USB A to C Charging/data cable
- User documentation

## **RESPONSIBLE PACKAGING**

- The paper packaging comes from FSC-certified forests
